TITLE	Manoa's Community College Transfers, Fall 1970-Fall 1974.
INSTITUTION	Hawaii Univ., Honolulu. Community Coll. System.
REPORT NO	CC-IRP-75
PUB DATE	Feb 75
NOTE	21p.
EDRS PRICE	MF-$0.76 HC-$1.58 PLUS POSTAGE
DESCRIPTORS	*College Majors; College Students; Females; *Followup Studies; *Grade Point Average; *Junior Colleges; Males; Student Characteristics; *Transfer Students
IDENTIFIERS	*University of Hawaii

ABSTRACT

This document presents a series of tables providing information regarding community college transfers to the Manoa and Hilo campuses of the University of Hawaii. Data was obtained from several campus computer reports and the community college graduate lists submitted to the Office of the Vice President for Community Colleges. The following tables are presented: (1) number of students transferring to the Manoa campus (UHM) from each of the six Hawaii community colleges in fall and spring semesters, 1970-1974; (2) distribution of transfers to UHM by college major, class, sex, and community college diploma earned, fall and spring 1970-1974; (3) mean Grade Point Ratios (GPR's) for community college transfer continuing at UHM, fall 1972-fall 1974; (4) number of graduates with a community college history by community college and major at UHM, fall 1972-fall 1974; (5) number of community college transfers to the Hilo campus (UHH) in spring and fall semesters, 1972-1974; (6) mean GPR for transfers continuing at UHH, fall 1974; (7) distribution of transfers to UHM from each of the six Hawaii community colleges by college major, class, sex, and community college diploma earned, fall and spring 1970-1974; (8) number of UHM graduates with a background at each of the six Hawaii community colleges by major, fall 1972-summer 1974. MANOA'S COMMUNITY COLLEGE TRANSFERS
FALL 1970 - FALL 1974

This report will update and combine the various information releases regarding community college transfers to Manoa. Data include the volume of transfers, their academic standing as continuing students, and graduation statistics when a baccalaureate degree has been achieved.

Numerous requests regarding transfer students have been received for use in evaluation, accreditation reports, information to present to the Legislature, curriculum planning, staff projections.

Sources of Data: Several Manoa campus SER computer reports (1402, 3092, 2515 A and B, 2540) and the community college graduation lists submitted to the Office of the Vice President for Community Colleges were used as sources of information for this report.

Highlights

Tables I and II: Transfers to UHM with Community College Background

1. Volume:

   a. The number transferring to the Manoa campus from the community colleges over the past nine semesters (fall 1970-fall 1974) total 4,715.

   b. Nine hundred twenty-three transferred in fall 1974 compared to 294 in fall 1970.

   c. As expected fewer students transferred in the spring semesters.

   d. The number transferring from Kapiolani increased most dramatically, from 33 to 280.

2. Choice of UHM College:

   a. Over half opted for the College of Arts and Sciences (ranging from 51-63 percent at various times).

   b. The College of Business Administration was the second largest attractor of students until fall 1974. (Ranging from 11-16 percent; 8 percent of transfers in fall 1974.)

JC 750 180

c. A growing number and proportion of students transferred as non-degree students (unclassified) and were designated as students in the College of Continuing Education.

3. Class Status at UHM: The great bulk of students (41-51 percent) transferred as sophomores, followed by students transferring as juniors (11-39 percent).

4. Sex: Males comprised well over half of the transfers (55-66 percent).

5. Community College Diplomas Earned: Transfers with community college diplomas comprised about 21 percent of the group in fall 1974. (They ranged from 5 to 29 percent of the transfers at various times.)

Table III: Mean GPRs: UHM 'Continuing' Students with Community College Background

1. Volume: UHM "continuing" students, i.e., students who were on campus the previous semester, with community college background numbered over 2,000 for each of the past two semesters.

2. Mean GPRs:

   a. The average GPRs of these students rose from 2.6 in fall 1972 to 2.8 in fall 1973 and has stabilized at that figure.

   b. An analysis by colleges indicates that mean cumulative GPRs of continuing students improved for students from all of the colleges over the years.

   c. Mean cumulative GPRs ranged from 2.72 (Kapiolani, 479 students) to 3.12 (Windward, 29 students) in fall 1974.

   d. Mean cumulative GPRs for students from Honolulu Community College rose from 2.59 to 2.82 over the years.

Table IV: Manoa Graduates with a Community College History

1. Volume: 753 former community college students graduated from the Manoa campus during the six graduation dates covering fall 1972-summer 1974.

2. UHM College and Major:

   a. An analysis by UHM colleges shows that the largest number of students received their degrees from the College of Education (255, 34 percent), followed by students from the College of Arts and Sciences (235, 31 percent) and the College of Business Administration (129, 17 percent).

BEST COPY AVAILABLE

b. In terms of student majors of the graduates, elementary education majors were the most numerous (109), followed by secondary education majors (107), sociology majors (65), accounting and finance majors (50) and majors in human resource development (49).

Transfers to Hilo College: (See Appendix A)

Limited data are available on transfers to Hilo College. A total of 95 transferred over the past five semesters. Of these, 32 were from Maui Community College, 24 from Leeward Community College and 19 from Kauai Community College.

The mean GPR of the 42 continuing students was 2.99 in fall 1974. Mean GPRs by community college ranged from 2.19 (2 students, Honolulu CC) to 3.23 (5 students, Kapiolani CC).

Summary

The number of transfer students and continuing students with community college histories has increased dramatically over the past few years. Moreover, those continuing have managed to maintain creditable cumulative GPRs. The number of UHM graduates who are former community college students was 753 as of the summer 1974 graduation date. Particularly noteworthy is that while over half of the transfer students matriculated in the College of Arts and Sciences and less than 15 percent in the College of Education, graduates from the College of Education were the most numerous, 255, 34 percent, compared to graduates from the College of Arts and Sciences, 235, 31 percent. What are the implications of this phenomenon? To what extent does this reflect the changing of majors and college on the part of the students, i.e., pre-education, College of Arts and Sciences to the College of Education which does not accept lower division students? to other factors? What implications for curriculum planning do individual college data on transfers and graduates (in terms of UHM colleges chosen) provide?
